DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species for the nozzle openings are as follows:

Species 1: Nozzle openings are radial passages

Species 2: Nozzle openings are beveled passages

Species 3: Nozzle openings are tangentially oriented or skewed passages

Species 4: Nozzle openings are elongated or slot-shaped

Upon selection of a nozzle opening the applicant is further required to elect an axial nozzle opening from the following:

Species A: The axial nozzle opening is diffuser-shaped

Species B: The axial nozzle opening is a venture nozzle

Species C: The axial nozzle opening is provided with an outlet cross section

which narrows in the axial direction

Species D: The axial nozzle opening is asymmetrically formed

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

Art Unit: 3709

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Species 1: 4
Species 2: 5
Species 3: 6-9
Species 4: 10-11
Species A: 14
Species B: 15
Species C: 16
Species D: 17

The following claim(s) are generic: 1-3, 12-13 and 18-28.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The special technical feature of forming the nozzle openings as radial passages is disclosed in Maita et al, 4,993,941. The second technical feature of forming the axial nozzle opening diffuser-shaped is disclosed in LaSalle et al. 6,273,789. Therefore forming the nozzle openings as radial passages and the axial nozzle opening as diffuser-shaped is considered a common technical feature.

4. A telephone call was made to James Finder on August 27, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3709

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Heidi M. Bashaw whose telephone number is 571-270-
